

CONSTRUCTION · MAINTENANCE · FIELD SERVICES

Your real field, finally reliable.

Hours, tasks, photos, videos and approvals: Fullyn Field connects your field teams straight to your ERP.

The office prepares. The field delivers.
Everything lands in the right place.

Real cost per job

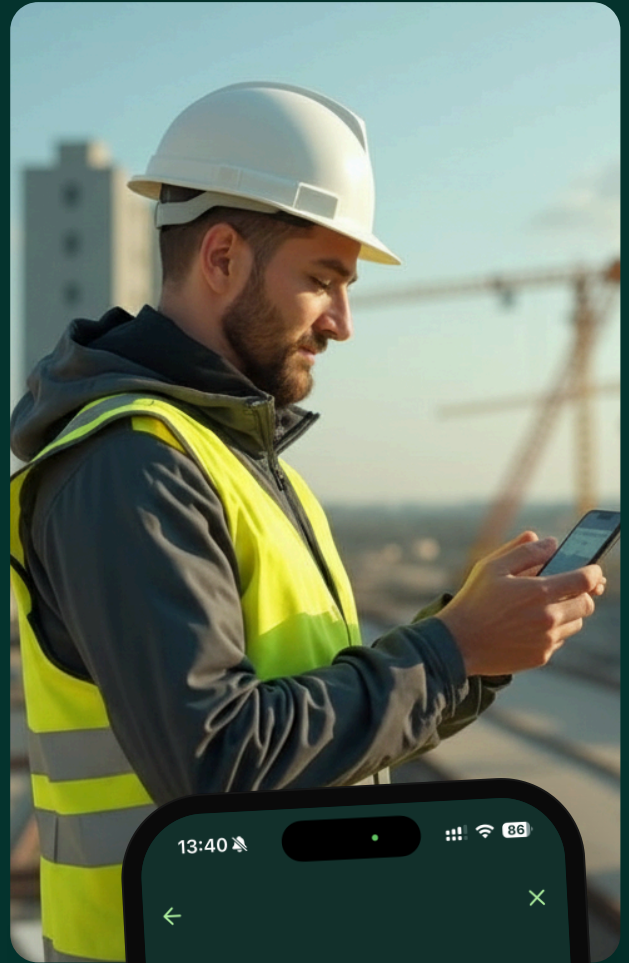

Time tracking

Photos & videos

Voice comments

Leave & absences

Native ERP integration

Every week, your office **rebuilds** what happened in the field.

Declared hours, travel that is hard to verify, scattered photos, comments sent by message, late approvals, re-entry into the ERP or payroll: too much field information stays incomplete or arrives far too late.

 Hours Declared, rounded, questioned at month end.	 Travel Journeys and distances hard to reconstruct.	 Photos Scattered across phones, emails and chat apps.	 Approvals Late, made far from the field, at the wrong moment.	 Re-entry Double capture in the ERP and payroll — a source of errors.
---	--	---	--	--

CONSEQUENCE it is impossible to know what each **job** — and each **task** — actually cost. Hours and expenses rarely end up on the right project.

“ Fullyn Field turns what really happens in the field into **reliable data in your ERP, in real time.** ”

IN REAL TIME

A simple day, from **planning** to approval.

1

THE OFFICE

The office prepares

Job, intervention, team, schedule and tasks are **prepared in the planning tool**.

2

THE TEAM

The team starts

The operator or team lead taps **Start**. Time, job and GPS position are captured in context.

3

ON SITE

The work leaves a trace

Photos, written or voice comments, progress and extra services **come straight from the field**.

4

END OF INTERVENTION

The team closes out

Hours, worksheet, intervention report and optional signature are **completed in a few taps**.

5

THE TEAM LEAD

The lead approves

Data is corrected or approved **as close to the field as possible**, before the office uses it.

- **One field app. One single truth in your ERP.**

Every hour, every kilometre and every photo **linked to the right job and task**.

Fewer declarations. Less re-entry. More reliability.

One tool, four ways to win — from the field all the way to management.

FOR FIELD TEAMS

Simple, in a few taps

- ✓ A simple app, very few actions.
- ✓ The day's tasks already prepared.
- ✓ Photos and comments in the right folder.

FOR TEAM LEADS

Control from the field

- ✓ Time tracking for the whole team.
- ✓ A live view of jobs in progress.
- ✓ Approve, correct or reject from the app.
- ✓ Anomalies handled where they appear.

FOR THE OFFICE

No more double entry

- ✓ Time and real cost broken down by job, task and intervention.
- ✓ Photos, videos and structured evidence.
- ✓ Anomalies flagged, no more field re-entry.

FOR MANAGEMENT

Data that holds up

- ✓ The real cost of every job, not an estimate.
- ✓ Better margins, tracked project by project.
- ✓ Better traceability.
- ✓ End-to-end management inside Odoo.

AND ALSO · TEAM SIDE

Leave and absences, managed from the app.

No call to the office, with proof attached.

Leave balance

Visible in real time.

Leave request

Sent from the app.

Report an absence

Sickness or bad weather, with proof.

What happens on site stays documented.

Photos and videos

The team attaches photos and short videos to the job: the real state of the site is recorded in the right folder.

Voice comments

Comments and observations dictated out loud, with no typing — even with gloves on or hands full.

Travel

Journeys linked to the intervention are captured with the job, ready for processing by the office.

— RIGHT ON SITE

Worksheets

The operator opens the worksheet for the intervention and fills it in from the field, at the moment the work is done.

No paper, no re-entry once back at the office.

- Open the worksheet for the intervention.
- Fill in the expected fields on site.
- Attach photos, videos and observations.
- Everything lands on the right job and task.

Fullyn Field tells you who was on site. **And with what evidence** the work was carried out.

CONNECTED TO YOUR ERP

No parallel system.

Planning, tasks, hours, photos, videos, comments, absences, approvals and field data all stay inside the same management environment.

No pointless re-entry. One single tool.

In your **ERP**

— THE DEMO

See Fullynn Field on your own **field reality.**
